

EU Battery Compliance

VALIDX helps you understand what applies, verify the evidence and control battery compliance before risk moves downstream.

6 Connected Services

01 BATTERY REGULATORY APPLICABILITY REVIEW

THE QUESTION

What applies to this exact battery —and who is responsible?

WHAT THIS HELPS YOU SECURE

A clear rulebook before design, procurement or supplier commitments are locked in.

WHAT VALIDX CHECKS

Category & product boundary • economic-operator role • applicable requirement families & dates • conformity route • who must provide which evidence

DELIVERABLES

Applicability Matrix
Responsibility Map
Requirement / Deadline Matrix

02 EU MARKET ENTRY COMPLIANCE REVIEW

THE QUESTION

Can we rely on this package before EU market entry?

WHAT THIS HELPS YOU SECURE

A defensible basis to proceed, proceed conditionally or hold until material gaps are closed.

WHAT VALIDX CHECKS

Exact model identity • technical documentation • conformity evidence • EU DoC / CE • labels / QR • traceability • Passport readiness where in scope

DELIVERABLES

Market Entry Report
Executive RAG Dashboard
Evidence Status + Action Register

03 SUPPLIER TECHNICAL EVIDENCE REVIEW

THE QUESTION

Do these hundreds of pages actually provewhat the supplier says?

WHAT THIS HELPS YOU SECURE

Evidence you can understand, challenge and defend —tied to the battery you are actually buying.

WHAT VALIDX CHECKS

Category & product boundary • economic-operator role • applicable requirement families & dates • conformity route • who must provide which evidence

DELIVERABLES

Supplier Evidence Register
Traceability Matrix
Gap & Clarification Log

✓ WHY NOW

Battery requirements phase in by category and date. The Battery Passport becomes mandatory from 18 February 2027 for LMT, EV and industrial batteries >2 kWh in scope. Other requirements have different application dates.

04 VALIDX QR & DPP ASSURANCE

THE QUESTION

Is this really a Battery Passport —or only a QR page?

WHAT THIS HELPS YOU SECURE

Independent assurance over the live DPP implementation —not only the interface.

WHAT VALIDX CHECKS

Identity • QR / data carrier • required data & evidence • access / update rights • integrity / security • persistence • interoperability • governance

DELIVERABLES

Assurance Report, DPP Control Matrix QR Verification, Certificate / Mark*

05 BATTERY COMPLIANCE CHANGE ASSESSMENT

THE QUESTION

Something changed —what now?

WHAT THIS HELPS YOU SECURE

Controlled change without silent compliance drift or accidental new exposure.

WHAT VALIDX CHECKS

Product / classification • economic-operator role • evidence representativeness • documents / labels • DPP impact • reassessment need

DELIVERABLES

Change Impact Statement, Update List Reassessment Recommendation

06 BESS PROCUREMENT, FAT/SAT & HANDOVER ASSURANCE

THE QUESTION

Before acceptance, did we really receive what was specified and promised?

WHAT THIS HELPS YOU SECURE

Earlier gap discovery, stronger supplier accountability and a cleaner BESS acceptance process.

WHAT VALIDX CHECKS

Supplier evidence • procurement requirements • pre-FAT review • FAT / SAT witness records • commissioning evidence • handover package / open points

DELIVERABLES

Procurement Review, FAT / SAT Records/ Open Points, Handover Report

✓ SUPPLIER ✓ MANUFACTURER ✓ IMPORTER ✓ DISTRIBUTOR ✓ OEM / EPC ✓ OWNER

SIX QUESTIONS WE ARE USUALLY ASKED:

- ✓ **Does the Regulation apply only to manufacturers?**
No. Different actors have different duties; an OEM/EPC can take another role depending on the transaction.
- ✓ **Is a QR code the same as a Battery Passport?**
No. The QR is the access point; the Passport also needs governed data, evidence, rights, integrity and responsibility.
- ✓ **Do all batteries need a Battery Passport?**
No. From 18 Feb 2027: LMT, EV and industrial batteries >2 kWh in scope. Other categories still have other duties.
- ✓ **Does responsibility pass with the invoice?**
No. Commercial ownership and regulatory responsibility are different. What each actor actually does determines the role.
- ✓ **What do we receive at the end?**
Named outputs: matrices, reports, evidence registers, dashboards, action lists and FAT/SAT/handover records, depending on scope.
- ✓ **Does VALIDX take over our legal responsibility?**
No. VALIDX provides independent technical assessment and assurance; the economic operator keeps its legal obligations.
